You can achieve a maximum of **70 points**. Some requirements are **must-have (marked with must-have)**. 0 points if the must-haves are implemented.

Documentation (20P)

- includes screenshots of the whole workflow
- includes descriptions of the whole workflow
    - Kanban Board, feature branch, pull request, ...
    - e.g. what are your actions after a user story is assigned to you?
    - *exemplary process for one user story is enough*
- includes link to the **public** GitHub repository **(must-have)** ✓

Git (10P)

- use correct branches and branch names ✓
- use correct commits and commit messages ✓

Implementation (10P)

- application is runnable
- all requirements are implemented

Testing (10P)

- every method has at least two unit tests ✓
- positives and negative test cases are used ✓

DevOps (20P)

- Kanban board is used to manage user stories ✓
- use pull requests **(must-have)** ✓
- tests are run automatically on each feature branch push ✓
- jar file is uploaded to GitHub on each main branch merge
